

Florida State Courts System Class Specification

Class Title: Senior Applications/Database Analyst

Class Code: 4260

[Pay Grade 110](#)

General Description

The essential function of this position within the organization is to research, design, develop, recommend, and implement technologies related to databases, web and SharePoint infrastructure. This position works to ensure that the platforms, services, and processes to support the automation of business processes involving SharePoint, SQL Server database technologies, Oracle database technologies, and web environments within its domain are highly available. That includes the planning and implementation of efficient operational processes that support availability, scalability, and capacity under the direction of the Application/Database Administrator. This position is responsible for ensuring the operations of the Courts' databases, SQL Server Analysis and Reporting Services, SQL Server Integration Services, SharePoint and IIS services. This position troubleshoots and diagnoses issues with databases, IIS and SharePoint providing services to the various business users and application owners. This includes installations, backups, upgrades, monitoring of SQL Server Reporting Services, SQL Server Integration and Analysis Services, SQL Server databases, Oracle databases, SharePoint and IIS. This position, under the direction of the Applications/Database Administrator, participates in feasibility studies, architectural reviews, technical walkthroughs, and planning sessions with business users and other ISS staff. This position is responsible for assisting in the development of standards and policies for SharePoint governance, IIS administration, SQL Server Reporting, Integration and Analysis Services, SQL Server and Oracle database administration in the Courts. This position also administers and assists users with third party software, as appropriate.

Examples of Work Performed

(Note: The examples of work as listed in this class specification are not necessarily descriptive of any one position in the class. The omission of specific statements does not preclude management from assigning specific duties not listed herein if such duties are a logical assignment to the position.)

Provides platforms, technologies and databases to support the automation of business processes for the Court.

Provides documents, project plans, implementation plans, deployment checklists related to their area of responsibility.

Participates in requirements gathering and design sessions related to SharePoint, Oracle, SQL Server Integration, Analysis and Reporting.

SENIOR APPLICATIONS/DATABASE ANALYST

Analyzes, designs and prototypes software applications related to SQL Server Integration, Analysis, Reporting Services, databases, Oracle, SharePoint and IIS; tests and implements production software applications.

Provides mentoring and knowledge transfer to business users, technicians and application developers in the area of automating business processes using SharePoint, database, SQL Server Integration, Analysis and Report Service automation.

Designs, develops and monitors databases, database processes, SQL Server Reporting, Integration and SharePoint processes.

Participates in the implementation of performance monitoring technologies and will be responsible for monitoring performance as directed by the Application/Database Administrator.

Assists in the implementation of capacity planning of databases and SharePoint environments in the Courts under the direction of the Application/Database Administrator.

Monitors database, SQL Server Integration, Analysis, Reporting Services, SharePoint and IS operations and security to ensure maximum efficiency and compliance with applicable regulations and laws. Security will be based on separation of duties/responsibilities and will ensure effective management of the environments, platforms and services supported.

Performs research and testing of software updates for IS software under its domain SQL Server Integration, Analysis and Reporting Services, database software and SharePoint. May provide coordination for testing processes with application and other ISS groups.

Participates in implementing common technology processes in the Courts under the direction of the Applications/Database Administrator and based on Microsoft's Operational Framework. This includes assisting in the automation of change management, release management, asset management, service management and infrastructure management.

Uses ISDM and project management methodologies to organize and document work.

Researches, implements and tests hardware/3rd-party software upgrades specific to the SQL Server environment, database, SharePoint and IIS environments; evaluates operations and makes recommendations and adjustments as directed.

Researches, designs, implements, monitors, and maintains the systems, infrastructure, processes and databases efficiently.

SENIOR APPLICATIONS/DATABASE ANALYST

Participates in planning sessions and works on assigned tasks for implementing new application development platforms and technologies in the Court that relate to SQL Server technologies, database and SharePoint. Brings up issues and risks to the Application/Database Administrator for resolution.

Works on a team as directed to assist in the planning, documentation and implementation of new systems.

Works as a member of the DBA team to ensure that standards are developed related to the management and architecture of the SQL Server environment, Oracle databases, SharePoint and IIS processes.

Serves as information resource for SharePoint, database design, database processes, SQL Server Reporting, Integration and Analysis Services; performs troubleshooting of and assists business users and development staff in implementing solutions related to SQL Server Reporting, Integration and Analysis Services, databases, SharePoint and IIS.

Implements security, data integrity and backup/restoration based on policies, and procedures.

Provides status reports to manager and ensures that work flows through manager to ensure that priorities are being worked on.

Attends or conducts staff and other professional meetings to exchange information; attends technical or professional workshops or seminars to improve technical or professional skills.

Participates in problem resolution activities to assist in identifying technical issues, root cause and to provide work-arounds and resolutions taking into account business constraints. Tracks the problem and resolutions to ensure that the same issues do not keep resurfacing.

Monitors database hardware and software operations and security to ensure maximum efficiency and compliance with applicable regulations and laws.

Monitors implementation security, data integrity and backup/restoration policies and procedures.

Performs clerical tasks such as data entry, preparing routine or special reports, or assisting with compilation of informational materials.

Attends staff and other professional meetings to exchange information; attends technical or professional workshops or seminars to improve technical or professional skills.

SENIOR APPLICATIONS/DATABASE ANALYST
