Notes:

1. All jury management data used to calculate this information should relate only to petit juries. The data is for three state fiscal years (July to June). The data was provided by the clerk of the court for each county or the circuit court administrator. This data is self reported through the jury management reports, and the accuracy, validity, and reliability of this data can not be confirmed by OSCA staff.
2. All juror per diem expenditure data used to calculate this information relates only to petit juries and was provided by staff in the Finance and Accounting section of the OSCA.
3. Summoning yield is calculated by dividing the number of jurors available to serve by the number of prospective jurors summoned. The standard for summoning yield is 40%.
4. Percent to voir dire is calculated by dividing the number of jurors sent to voir dire by the number of jurors reporting to serve. The standard for percent to voir dire is 100%.
5. Cost per persons brought in per trial (PBI) is calculated by dividing the cost per trial by PBI. PBI is calculated by dividing the number of jurors reporting to serve by the number of trials.
