Florida State Courts System
Class Specification

Class Title: Information Systems Analyst

Class Code: 4105
Pay Grade 102

General Description

The essential function of the position within the organization is to design, analyze, implement and maintain computer programs. The position is responsible for developing computer programs and performing related clerical tasks. The position works under general supervision independently developing work methods and sequences.

Examples of Work Performed

(Note: The examples of work as listed in this class specification are not necessarily descriptive of any one position in the class. The omission of specific statements does not preclude management from assigning specific duties not listed herein if such duties are a logical assignment to the position.)

Designs, analyzes, develops, implements, tests, and maintains computer programs to allow users to enter, update and delete data in Courts System databases.

Conducts research to discover new methodologies and enhancements for users of the State Courts information system; plans and develops system requirements and enhancements.

Consults with court clerks, deputy clerks, judges and other appropriate staff regarding computer application requirements to ensure efficient operations for areas of responsibility.

Ensures compliance with applicable policies, procedures, regulations and laws in the performance of technical tasks.

Adheres to information Systems Development Methodology (ISDM) and Project Management documentation requirements as adopted by ISS. Also meets ISS information technology standards when developing.

Ensures that design and implementation procedures make use of appropriate information engineering principles under the ITIL framework as adopted by ISS, including ISS production Change Management, Release Management and Service Management.
Attends staff meetings to exchange information; attends technical classes, workshops or seminars to improve technical skills. Perfect skills in the use of application and database developmental tools.

**Competencies**

**Data Responsibility:**
Refers to information, knowledge, and conceptions obtained by observation, investigation, interpretation, visualization, and mental creation. Data are intangible and include numbers, words, symbols, ideas, concepts, and oral verbalizations.

Coordinates or determines time, place, or sequence of operations or activities based on analysis of data and possibly executes determinations or reports on events.

**People Responsibility:**
Refers to individuals who have contact with or are influenced by the position.

Persuades or influences others in favor of a service, course of action, or point of view.

**Assets Responsibility:**
Refers to the responsibility for achieving economies or preventing loss within the organization.

Requires minimum responsibility for only small quantities of low cost items or supplies where opportunities for achieving economies or preventing loss are negligible.

**Mathematical Requirements:**
Deals with quantities, magnitudes, and forms and their relationships and attributes by the use of numbers and symbols.

Uses practical application of fractions, percentages, ratios and proportions, measurements, or logarithms; may use algebraic solutions of equations and equalities, deductive geometry, and/or descriptive statistics.

**Communications Requirements:**
Involves the ability to read, write, and speak.

Reads scientific and technical journals, abstracts, financial reports, and legal documents; writes complex reports; makes presentations to professional groups.
Complexity of Work:
Addresses the analysis, initiative, ingenuity, creativity, and concentration required by the position and the presence of any unusual pressures.

Performs work involving the application of logical principles and thinking to solve practical problems within or applying to a unit or division of the organization; requires continuous, close attention for accurate results and frequent exposure to unusual pressure.

Impact of Decisions:
Refers to consequences such as damage to property, loss of data or property, exposure of the organization to legal liability, or injury or death to individuals.

Makes decisions with moderate impact - affects those in work unit.

Equipment Usage:
Refers to inanimate objects such as substances, materials, machines, tools, equipment, work aids, or products. A thing is tangible and has shape, form, and other physical characteristics.

Leads or handles machines, tools, equipment or work aids involving moderate latitude for judgment regarding attainment of a standard or in selecting appropriate items, such as computer applications.

Safety of Others:
Refers to the responsibility for other people’s safety, either inherent in the job or to assure the safety of the general public.

Requires some responsibility for safety and health of others and/or for occasional enforcement of the standards of public safety or health.

Education and Experience Guidelines

Education:
Refers to job specific training and education that is recommended for entry into the position. Additional relevant experience may substitute for the recommended educational level on a year-for-year basis.

Bachelor’s degree in computer science, management information systems or a closely related field.
Experience:
Refers to the amount of related work experience that is recommended for entry into the position that would result in reasonable expectation that the person can perform the required tasks. Additional relevant education may substitute for the recommended experience on a year-for-year basis, excluding supervisory experience.

Two years of related experience.

Licenses, Certifications, and Registrations Required:
Refers to professional, state, or federal licenses, certifications, or registrations required to enter the position.

None
