Clearance Rate(s)

The clearance rate is a useful measure of the responsiveness of a court to the demand for services, and is nationally recognized as a measure of court performance. The rate is determined by dividing the total number of cases *disposed* by the total number of cases *filed* during a specific time period. For example, if a court received 1,000 new cases in a month and disposed of 900 cases within the same month, the clearance rate for that month would be 90%. A 100% clearance rate means that a court is disposing of at least as many cases as have been filed during the reporting period. Thus, where clearance rates exceed 100%, those circuits are actually disposing of cases more quickly than cases are being filed for the period in question.
